

CANADA

Canada is a versatile range of post-top fittings, ideal for urban amenity, municipal and housing areas.

On the following pages we list the individual members of the range, all of which are to be ordered as complete items, including European brand lamps and control gear. These are listed in their most popular formats, but because of the modular nature of the Canada range there is flexibility to deviate from the exact products shown on the following pages if required.

HEAD

Available in 4 shapes (Vancouver, Winnipeg, Niagara and Edmonton), as shown on the following pages. Several of the heads are available with a choice of materials and finishes. The head shown here is the Niagara.

LOUVRE

Made from satin finish stainless steel. Supplied as standard on all of the Canada range, apart from the Niagara and the semi-opal version of the Winnipeg where we consider that no louvre is required. A glass refractors is available as an alternative to the louvre via a special order. Please ask for details.

LAMP

All products in the Canada range are supplied with premium brand SON, HQI or PLT lamps.

COVER PIPE

Available in 2 colours, black and grey. A black cover pipe is supplied as standard with Vancouver, Niagara and Edmonton. A grey cover pipe is supplied as standard with Winnipeg.

GEAR TRAY

4 versions available. All share the same overall size and are fitted with an E27 (for HID) or 4-pin G24 (for compact fluorescent) lamp holder as appropriate.

- 70W SON
- 70W HQI
- 100W HQI
- 1x42W PLT

For 150W SON & HQI the gear is supplied for remote mounting, not on a gear tray, for thermal reasons.

GALLERY

4 versions available. Black or grey, 60mm or 76mm. The black galleries are short (as pictured here). The grey galleries are longer, as shown on the Winnipeg on page 146). A black gallery is supplied as standard with Vancouver, Niagara and Edmonton. A grey gallery is supplied as standard with Winnipeg. All Canada products are listed with 76mm galleries as standard, but can be supplied with 60mm galleries if required.

The Canada range is supplied as complete products. If any of the above items are required as spare parts please enquire for details.
